WORK EXPERIENCE

Noble Software

Feb 2022 - Aug 2023

Frontend developer

- Used understanding of react fundamentals to create better component-lifecycle practices to prevent unnecessary renders increasing the speed of website
- Implemented better reusable components and write better well-maintained code to meet deadlines faster when working in a team.
- Communicated with design team to discuss possible animations to make the user experience better.
- Communicated with backend team to discuss better approaches for dividing computational power between browser and backend for a lag-free user experience.

Visiram Solutions

Jan 2020 - June2022

React Intern

July 2020 - Jan 2022

Product developer

- Trained on various real-world projects using react js, react-native, angular, node js, express, and css and bootstrap for styling and maintained the website alone.
- Worked on a demo app alone in a single day and was able to secure the project for the company.
